SUMMARY

Aspiring front-end developer with hands-on experience in building responsive and dynamic web applications. Proficient in React, JavaScript, HTML, and CSS, with a strong understanding of modern web development practices, including state management, routing, and API integration. Completed numerous projects, such as a CV application and a book inventory system, demonstrating a solid grasp of UI/UX principles and best practices in component design. Actively engaged in continuous learning, and eager to apply my skills in a real-world environment as a front-end intern.

TECHNICAL SKILLS

HTML, CSS, JavaScript, Jest, Webpack, Jest, Vitest, React.js, Node.js, Express, Git, PostgreSQL, MongoDB, Mongoose

EDUCATION

Bachelor's in Computer Application

Jan 2023-Present

Madan Bhandari Memorial College, Kathmandu, Nepal

Higher Secondary School

2021-2023

Dhulabari Secondary School, Dhulabari, Jhapa

PROJECTS

Shopping Cart:

- **Description:** A responsive single-page application (SPA) designed to mimic the functionality of an e-commerce shopping cart. The project allows users to browse products, add items to their cart, and manage their purchases in real-time, providing a seamless shopping experience.
- GitHub: Shopping Cart
- Key Features:
 - Dynamic Cart Management: Users can add, update, and remove items from the cart, with the
 total amount and item count updated in real-time.
 - Responsive Design: The application is fully responsive, ensuring a smooth experience across
 devices, from desktops to mobile phones.

To-Do App:

- **Description:** A simple and intuitive task management application designed to help users organize and track their daily activities. The app allows users to create, update, and delete tasks efficiently.
- GitHub: To-Do App
- Key Features:
 - o *Task Management:* Users can easily add, edit, and remove tasks.
 - *Dynamic Task List:* Tasks are automatically displayed based on their status (e.g., pending, completed), providing a clear view of what needs to be done.

Book-Inventory:

- **Description:** A comprehensive inventory management system for books, allowing users to organize, track, and filter books by various attributes such as genre and author. The application provides a streamlined interface for managing book details and categories.
- *GitHub:* Book-Inventory
- Key Features:
 - *Advanced Filtering:* Users can filter books by genre and author, making it easier to locate specific items within the inventory.
 - *CRUD Operations:* Full functionality to add, update, and delete books and genres, ensuring the inventory is always up-to-date.

ACHIEVEMENTS

- Successful completion Leapfrog 60days learning. (certificate)
- Outstanding performance in academics.
